

T110A

Restricted Hazardous Substances Conformance Declaration Products and Packaging Material

In accordance with the European Union Directive (EN 2002/95/EC) Restriction of Hazardous Substances (RoHS), SATO America declares that the product(s) listed is/are in conformance with the criteria established below. In addition, none of these substances are intentionally added during production or used in the manufacturing process.

Product(s) Name: T110A Thermal Transfer Ribbons

The components listed below contain concentration levels less than 0.1% by weight (1,000 ppm) of lead, hexavalent chromium, mercury, polybrominated biphenyls (PBB) or polybrominated diphenyl ethers (PBDE) and concentration levels less than 1.01% by weight (100 ppm) of cadmium in each homogeneous material used in its construction.

Product Name	Lead	Hexavalent Chromium	Mercury	Cadmium	Polybrominated Biphenyls (PBB)	Polybrominated Diphenyl Ethers (PBDE)	Note
T110A	Y	Y	Y	Y	N/A	N/A	We have not used PBB and PBDE for these products intentionally. Also, we have not used PBB and PBDE in manufacturing process.

Y signifies compliance to the stated maximum

N signifies non-compliance to the stated maximum

1. Other Substances are verified through ingredient lists, MSDS, supplier certifications, and manufacturer's knowledge of the product(s) and manufacturing processes.
2. Information on SATO T110A supplied by the manufacturer of T110A ribbons.
