

Duramark® Wristbands

SATO Life Science ID Solutions

SATO's DuraMark® Wristbands Enhanced Safety Through Positive Identification

SATO's DuraMark® Wristbands are virtually indestructible and display various details of patient information, encoded securely in a barcode. They remain legible even after extended exposure to water, abrasion, cleaners and everyday wear.

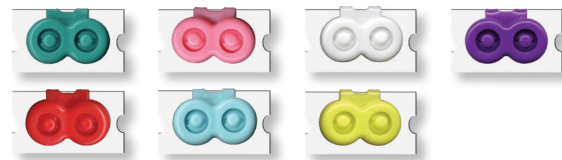

Each wristband provides enhanced safety through positive identification of individual patients, linked to a patient's medical or account number using both human-readable text, barcodes and if desired, a patient's picture. All without the need of thermal transfer ribbons which raise costs, are cumbersome, and under HIPAA guidelines require expensive destruction procedures.
